Learn to use your knowledge and talents within you through meditation to solve all your obstacles in life. This drug interaction was actually discovered accidentally by researchers when they used grapefruit juice to mask the taste of alcohol for their study, which was to see how an oral calcium-channel blocker called Plendil felodipine reacts to alcohol. They were surprised to find that in that particular trial, both the effects and side effects of the drug were amplified by the grapefruit juice because of the increased blood levels of felodipine. With further research, they were able to discover that the culprit was the juice itself and that it not only interacts with that specific drug but also with medications such as Viagra, Cialis and Levitra.
